The Journal of the Australian Institute of Agricultural Science

Cover
As agricultural science became more sophisticated, pleasant pastoral scenes appeared more rarely on the covers of our agricultural journals—more's the pity. This one was taken in Victoria's famous grazing lands of the Western District.

Cover
Since the Middle Ages, scientific progress and graphic reproduction have been intimately linked. Some of today's scholarly journals are still being produced by last century's 'hot metal' system as this recent picture taken in CSIRO's Printery attests. Modernization entails heavy capital outlays. Unless such outlays are made soon, the umbilical relationship between science and publishing will be severed.
